# Owlint
Smart data

Protect your assets and employees from threats related to their online exposure

73% of cyber attacks against businesses exploit human vulnerabilities[1].

Every day, you leave traces on internet that can be used by attackers against your employees and your company (phishing, identity theft, etc.)

Owlint is the only turnkey digital footprint platform that helps protect your staff and business, without requiring months of training!

[1] Report « État de la menace liée au numérique » Ministère de l'Intérieur – 2019

360° detection

Owlint centralizes the digital footprint from the Clear Web, Deep Web and Dark Web.

Assessment AI

The proprietary AI OwlAnalytics establishes a level of risk on each element detected.

Analysis help

Owlint offers preprocessing and helps to save you time during analysis.

GDPR compliant

Owlint complies with the General Data Protection Regulation.

1. Clear, Deep and Dark detection

Fill in some information (last name, first name, email, phone, etc.) and automatically **get a Clear Web, Deep Web** (thanks to our OwlSearch® engine) and **Dark Web** (via our DarkSearch® engine) **exposure report**.
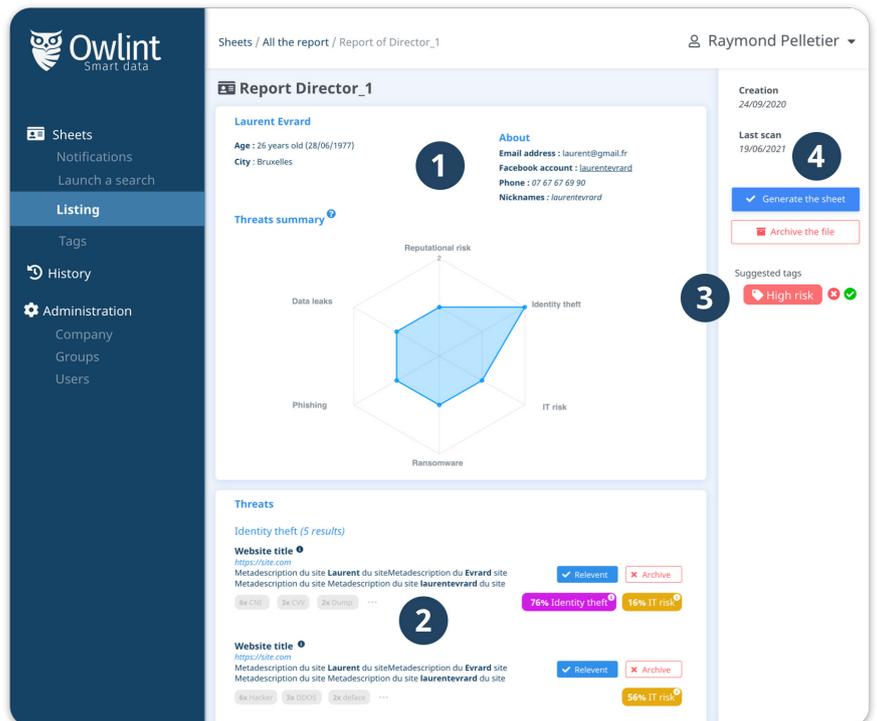

2. Calculation of the risk level

Our proprietary AI OwlAnalytics **contextualizes each detected element** and calculates an associated **level of risk**.

3. Analysis help interface

Our analysis platform provides you with a **set of helps and pre-treatments to save you time** when analyzing the results.

4. Report generation

In addition to the interactive report via the platform, export the **report to individually educate your staff** and **act on their exposure**.
